

LATE OIL COMPANY
809 SAN ANGELO NATIONAL BANK BUILDING
SAN ANGELO, TEXAS

September 21, 1953

Mr. A.L. Porter, Jr.,
Oil Conservation Commission
Hobbs, New Mexico.

Dear Sir:

We have your letters of September 8 regarding producing formation on our J.K. Rector #1-A, G, Section 31-21S-36E, and; the producing formation on our Louis Thomas Well No. 1, Section 17-24S-37E.

Please be advised that the J.K. Rector #1-A G, Section 31-21S-36E is producing from the Seven Rivers formation.

The Louis Thomas well No. 1, Section 17-24S-37E is producing from the Yates sand thru perforations in 7" casing.

We trust the above information will clear your records for approval of Forms C-104 which you are holding on the above described wells.

Formal request for extension of South Eunice Pool to take in the Rector No. 1-A will follow.

Yours very truly,

Late Oil Company

A handwritten signature in dark ink, appearing to be "W. H. Hester", written over the typed name "Late Oil Company".

A very faint, handwritten signature or set of initials, possibly "C. L. ...", located at the bottom of the page.
