Gentlemen:

This is to advise that effective September 1, 1969 your State D No. 5 located in Unit C of Section 32, T-21-S, R-36-E will be reclassified as a gas well in the Eumont Gas Pool due to the recently submitted gas-oil ratio test, and the oil allowable will be cancelled effective that date.

Please advise when you have complied with the provisions of Commission Order No. R-1670 pertaining to the Eumont Gas Pool so that we may assign a gas allowable.

Yours very truly,

1. *Chlorophyll a* and *Chlorophyll b* were determined by the method of Lichtenthaler and Whistler (1973).

1. The first step is to identify the problem or question that needs to be answered. This involves understanding the context and the specific information required.

1. The first step in the process of identifying a problem is to define the problem. This involves identifying the symptoms of the problem and determining the scope of the problem. Once the problem has been defined, the next step is to identify the causes of the problem. This involves identifying the factors that are contributing to the problem and determining the underlying causes. Once the causes have been identified, the next step is to develop a plan to address the problem. This involves identifying the actions that need to be taken to address the problem and determining the resources that will be needed to implement the plan. Finally, the last step in the process is to implement the plan and monitor the results. This involves putting the plan into action and tracking the progress of the plan to ensure that the problem is being addressed effectively.
