

**NEW MEXICO OIL CONSERVATION COMMISSION**  
Santa Fe, New Mexico

**MISCELLANEOUS NOTICES**

Submit this notice in triplicate to the Oil Conservation Commission or its proper agent before the work specified is to begin. A copy will be returned to the sender on which will be given the approval, with any modifications considered advisable, or the rejection by the Commission or its agent, of the plan submitted. The plan as approved should be followed, and work should not begin until approval is obtained. See additional instructions in the Rules and Regulations of the Commission.

Indicate nature of notice by checking below:

NOTICE OF INTENTION TO TEST CASING SHUT-OFF		NOTICE OF INTENTION TO SHOOT OR <del>CHANGE OR ALTER WELL</del>	<b>X</b>
NOTICE OF INTENTION TO CHANGE PLANS		NOTICE OF INTENTION TO PULL OR OTHERWISE ALTER CASING	
NOTICE OF INTENTION TO REPAIR WELL		NOTICE OF INTENTION TO PLUG WELL	
NOTICE OF INTENTION TO DEEPEN WELL			

Eunice, New Mexico  
Place

Date

OIL CONSERVATION COMMISSION,  
Santa Fe, New Mexico.

Gentlemen:

Following is a notice of intentiton to do certain work as described below at the \_\_\_\_\_

General Crude Oil Company State "E" Well No. 1NW1SW1  
Company or Operator Lease  
of Sec. 32, T. 21, R. 36, N. M. P. M., Eunice, Field,  
Lea County.

**FULL DETAILS OF PROPOSED PLAN OF WORK**

FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS OF THE COMMISSION

**Intention to Shoot 7" Casing from 3737 to 3742 feet with 5 quarts of Nitro to test formation cased off when set 7" Casing. 7" Casing set at 3826'.**

The Present production of well is 5 barrels of oil with 20 barrels of water, pumping with 2 1/2" Upset tubing and 2 1/2" x 10' CommonsSteel Working Barrel.

If we can not increase production after shooting the casing, will Plug.

DELETED COPY

Approved JUL 9 1936, 19\_\_\_\_  
except as follows:

General Crude Oil Company  
Company or Operator

By Jesse Hildreth  
Position Dist. Supt.

Send communications regarding well to

Name Jes e T. Hildreth

Address Wink, Texas. Box 685,

OIL CONSERVATION COMMISSION,  
By [Signature]  
Title Oil & Gas Inspector

# Mathematics

The first part of the course covers the basic concepts of algebra, including the properties of numbers, the order of operations, and the use of variables. Students will learn how to solve linear equations and inequalities, and how to graph these on a coordinate plane. The second part of the course focuses on geometry, covering the properties of triangles, quadrilaterals, and circles. Students will learn how to calculate the area and perimeter of these shapes, and how to use the Pythagorean theorem. The third part of the course introduces the concepts of probability and statistics, including how to collect and analyze data, and how to calculate the mean, median, and mode.

The fourth part of the course covers the basics of trigonometry, including the properties of right-angled triangles, the sine, cosine, and tangent functions, and the use of the unit circle. Students will learn how to solve problems involving angles and distances, and how to use trigonometric identities. The fifth part of the course introduces the concepts of vectors and matrices, including how to add and multiply vectors, and how to solve systems of linear equations using matrices. The final part of the course covers the basics of calculus, including the concepts of limits, derivatives, and integrals, and how to use these to solve problems involving rates of change and area under a curve.

The course is designed to provide a solid foundation in mathematics, and to develop the problem-solving skills and logical reasoning abilities of the students. It is suitable for students who are interested in pursuing a career in science, technology, engineering, or mathematics, or who simply want to improve their mathematical skills. The course is taught in a clear and concise manner, with plenty of examples and exercises to help students understand the concepts and apply them to real-world situations. The course is also available in a self-paced format, allowing students to learn at their own pace and on their own schedule.

The course is taught by experienced and qualified teachers who are passionate about mathematics and enjoy sharing their knowledge with their students. They use a variety of teaching methods, including lectures, demonstrations, and group work, to ensure that all students can understand the material. The course is also supported by a range of resources, including textbooks, worksheets, and online materials, to help students learn more effectively. The course is assessed through a combination of quizzes, assignments, and a final exam, to ensure that students have a good understanding of the material and are able to apply it to new situations.
