Re: Application to Dually Complete
Gulf Oil Corporation's J. F.
Janda "B" No. 1, Eumont Gas
and Eumont Oil Pools, Lea
County, New Mexico

Gentlemen:

By this letter of application, Gulf Oil Corporation wishes to state the following:

(a) That Gulf Oil Corporation's J. F. Janda "B" No. 1, located in the NW/4 SE/4 of Section 32-21S-36E, was completed on March 7, 1936 at a total depth of 3905'. The attached Exhibit "A" shows the location of this well on the Gulf Oil Corporation's J. F. Janda "B" Lease together with the location of all offset wells. The attached Exhibit "B" shows a diagrammatic sketch of the proposed dual completion.

(b) That subject well has 5-1/2" casing set at 3777' and cemented with 300 sacks of cement. The well is a gas well producing from the perforated interval from 3230-3560' from the Yates formation in the Eumont Gas Pool.

(c) That the applicant proposes to dually complete the well in the following manner:

(1) Perforate the open hole below the 5-1/2" casing within the approximate intervals of 3780-3810' in the Queen formation in the Eumont Oil Pool.

(2) Set production type packer above these perforations at approximately 3650' to separate the two pay zones.

(3) Produce the Eumont Pool oil through the tubing and the Eumont Gas through the tubing-casing annulus.

(d) That the granting of this application for permission to produce the well as a dual completion with gas from the Eumont and oil from the Eumont is in the interest of conservation and the protection of correlative rights.

(e) That the applicant will comply with all rules and regulations of the New Mexico Oil Conservation Commission to maintain separation of production from the two pay zones.

I hereby certify that the information given above is true and complete to the best of my knowledge.

Respectfully submitted,
