

system is approximately one-half mile from Janda "B" #3. The gas from this well has been offered to Phillips Petroleum Company, and Phillips has advised that the portion of their gathering system into which the gas from this well would have to be delivered is currently loaded to capacity, and they are unable to provide a market outlet at this time. Phillips further advised that there is the possibility of their rearranging or revamping their gathering system, and a decision will be made in the near future as to whether or not they are interested in taking the gas from the well.

The J. F. Janda "B" #3 has been closed in and will remain closed in pending the receipt of an exception to the No-Flare Order.

Gulf Oil Corporation will endeavor to provide a market outlet for the gas from this well either by the extension of its gas gathering system as soon as the handling of the gas by Gulf is economically feasible or by the contracting of the gas to Phillips if Phillips can utilize the gas earlier than Gulf can.

In view of the foregoing information and in order to restore the well to a productive status and thereby protect correlative rights, it is requested that the Oil Conservation Commission issue an exception to its No-Flare Order R-553 and thereby authorize Gulf Oil Corporation to flare gas from the J. F. Janda "B" #3.

Yours very truly,

B. E. THOMPSON
