

5. The Yates zone will be perforated at approximately 3,280' to 3,380'. This interval will be produced as a gas well through the casing.
6. The dual completion of this well will be in the interest of conservation and the mechanics of the dual completion are feasible and practical.
7. A non-standard gas proration unit of 160 acres comprising the SW/4 of Section 32, Twp. 21S, Rge. 36E, Lea County, New Mexico, will be requested.
8. The above described gas proration unit lies wholly within a single governmental section and consists of contiguous 40 acre tracts.
9. The entire proposed proration gas unit may be reasonably presumed to be productive of gas.
10. Copies of this application have been furnished all offset operators by certified mail.
11. Attached is Form C-128, location plat and diagrammatic sketch of proposed dual completion.

I request that the Oil Conservation Commission issue the necessary order permitting the dual completion of said well and permitting the assignment of the non-standard gas proration unit.

I hereby certify that the information given above is true and complete to the best of my knowledge.

Yours very truly,

J. H. Moore,
Operator
