Temporarily abandoned Eumont Oil Zone			

17. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

3310' PB.

A recent test indicated communication. Well is uneconomical to produce, at this time, as a dual. Temporarily abandoned Eumont oil zone as follows: Pulled tubing, seal assembly and tail pipe, leaving Baker Model D packer at 3775'. Ran Baker CI BP and set at 3310', temporarily abandoning Eumont oil perforations 3784' to 3814'. Above procedure approved by Mr. Joe D. Ramsey to Mr. C. D. Borland, August 24, 1971. Ran Guiberson Shorty Type packer on 2-3/8" tubing. Set bottom of tubing at 3085', packer set at 3053' with 9,000# tension. Well is now producing as a single completion from the Eumont gas zone thru 5-1/2" casing perforations 3100' to 3260'.

18. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
