

NEW MEXICO OIL CONSERVATION COMMISSION
Santa Fe, New Mexico

MISCELLANEOUS REPORTS ON WELL

Submit this report in triplicate to the Oil Conservation Commission or its proper agent within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of casing shut-offs, result of plugging of well, and other important operations, even though the work was witnessed by an agent of the commission. Reports on minor operations need not be signed and sworn to before a notary public. See additional instructions in the Rules and Regulations of the Commission.

Indicate nature of report by checking below:

REPORT ON BEGINNING DRILLING OPERATIONS		REPORT ON REPAIRING WELL	
REPORT ON RESULT OF SHOOTING OR CHEMICAL TREATMENT OF WELL		REPORT ON PULLING OR OTHERWISE ALTERING CASING	
REPORT ON RESULT OF TEST OF CASING SHUT-OFF	10-3/4	REPORT ON DEEPENING WELL	
REPORT ON RESULT OF PLUGGING OF WELL			

Hobbs, New Mexico, March 20, 1939

Place

Date

OIL CONSERVATION COMMISSION,
Santa Fe, New Mexico.

Gentlemen:

Following is a report on the work done and the results obtained under the heading noted above at the

GULF OIL CORPORATION

GIPSY DIVISION

Harry Leonard "C" (State)

Well No. 1

in the

COMPANY OR OPERATOR

LEASE

Center SE/4 SW/4

of Sec. **36**

T. **21S**

R. **36E**

N. M. P. M.,

Eunice

Field,

Lea

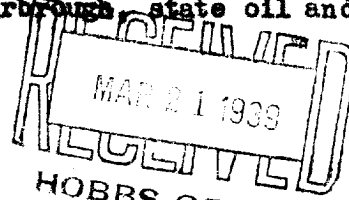

County

The dates of this work were as follows: **Cemented March 18, 1939- Tested March 19, 1939**

Notice of intention to do the work was ~~was not~~ submitted on Form C-102 on **March 20,** 19 **39**
and approval of the proposed plan was ~~was not~~ obtained. (Cross out incorrect words)

DETAILED ACCOUNT OF WORK DONE AND RESULTS OBTAINED

The hole was washed down, the casing tested with 1200# pressure applied for 30 mins., the plug drilled and the hole tested with 1200# pressure applied for 30 mins., both tests were OK and after approval of Mr. R. O. Yarbrough, state oil and gas inspector, preparations were made to drill ahead.

Representing **GULF OIL CORPORATION**
GIPSY DIVISION
Company or Operator

My Commission expires **February 25, 1942**

Address **Hobbs, New Mexico**

Remarks:

R. O. Yarbrough
Name
OIL & GAS INSPECTOR
Title

The first part of the paper discusses the importance of understanding the underlying mechanisms of the observed phenomena. This is followed by a detailed analysis of the data, which shows that the results are consistent with the theoretical predictions. The authors then discuss the implications of these findings for future research and for practical applications.

In the second part of the paper, the authors present a series of experiments designed to test the hypotheses derived from the theoretical model. The results of these experiments are presented in a series of tables and figures, which show that the model accurately predicts the observed behavior. The authors conclude that the model provides a good description of the system under study.

The third part of the paper discusses the limitations of the current study and suggests directions for future research. The authors note that while the model provides a good description of the system, it is still necessary to investigate the underlying mechanisms in more detail. They also suggest that future research should focus on developing more accurate models that can better predict the behavior of the system.

Finally, the authors discuss the practical implications of their findings. They note that the results of this study have important implications for the design and operation of the system under study. They suggest that the findings can be used to optimize the system and to develop more effective control strategies.

In conclusion, the authors state that this study has provided a detailed analysis of the system under study and has shown that the theoretical model accurately predicts the observed behavior. They believe that these findings will be useful to researchers and practitioners alike.
