propose to drill to	
propose to drill proximate depth of	
propose to drill i proximate depth of next to circulate.	
propose to drill i processe to drill i processe to drill i processe to drill i processe to directle of next to directle by 13% next 54" lbs conto.	
propose to drill ! proceduate depth of proceduate depth of next to circulate. opposite the proceduate. opposite the content proceduate of next 5g* lbg content proceduate of next jobs will be	
propose to drill in processing to drill in processing to drill in the control of	
propose to drill i proximate depth of next to circulate. approximately 325 ment 5g 1 hr central ups on surface, 36 ment jobs will be	
propose to drill the proximate depth of next to circulate. suppressingly 3150 ment 5g lbg contagues on surface, 35 ment John will be	
propose to drill to presimpte depth of ment to circulate. apprecimately \$150 ment 90" lbf central are on surface, 30 ment Jobe will be	this test to a depth of 6000' drilling a 13 3/2 hole to 200' and commuting 10 3/2" 32.75# easing with sufficient will drill a 9 7/8" hale and course 7 5/6" 25# easing the salt section by stage commuting. We sat 5690' with 300 and. Commut will be allowed to an hours on intermediate and 16 hours on oil string. All tested according to regulation.
propose to drill to proximate depth of next to circulate. opposituately \$150 ment 50° 140 central ure on surface, 30 ment jobs will be	this test to a depth of 6000' drilling a 13 3/2 hole to 200' and commuting 10 3/2" 32.75# easing with sufficient will drill a 9 7/8" hale and course 7 5/6" 25# easing the salt section by stage commuting. We sat 5690' with 300 and. Commut will be allowed to an hours on intermediate and 16 hours on oil string. All tested according to regulation.
propose to drill to province depth of next to circulate, opposite the province of the centre of the	this test to a depth of 6000' drilling a 13 3/2 hole to 200' and commuting 10 3/4" 32.75# coming with sufficient to will drill a 9 7/5" hole and commut 7 5/6" 25/4 commuted to 25/5" tests the wall section by stage commuting. We set 2070' with 350 and. Commut will be allowed to as hours on intermediate and 16 hours on oil string. All tests according to regulation.
propose to drill to proximate depth of ment to circulate. supermissionly 335 ment 5; lif central rest on surface, 36 ment Jobs will be to be a surface.	this test to a depth of 6000' drilling a 13 3/2 hole to 200' and commuting 10 3/4" 32.75# coming with sufficient to will drill a 9 7/5" hole and commut 7 5/6" 25/4 commuted to 25/5" tests the wall section by stage commuting. We set 2070' with 350 and. Commut will be allowed to as hours on intermediate and 16 hours on oil string. All tests according to regulation.
propose to drill to province depth of ment to circulate. copposite the province of the control	this test to a depth of 6000' drilling a 13 3/2 hole to 200' and commuting 10 3/4" 32.756 easing with sufficient to will drill a 9 7/6" hole and commut 7 5/6" 256 easing the salt section by stage commuting. We sat 3000' with 300 and. Commut will be allowed to as hours on intermediate and 16 hours on oil string. All tested according to regulation. Work must receive approval in writing by the Geological Survey before operations may be commutable.
propose to drill to proclamate depth of ment to circulate. supremission of 325 ment 5% lbf central section of 500 ment 100 will be to ment 100 wi	this test to a depth of 6000' drilling a 13 3/2 hole to 200' and commuting 10 3/4" 32.756 easing with sufficient to will drill a 9 7/6" hole and commut 7 5/6" 256 easing the salt section by stage commuting. We sat 3000' with 300 and. Commut will be allowed to as hours on intermediate and 16 hours on oil string. All tested according to regulation. Work must receive approval in writing by the Geological Survey before operations may be commutable.
propose to drill a present to circulate, expressionately 135 ment 36 lbs contains and 15 lbs contains are on surface, 36 ment jobs will be a surface. I understand that this plan of wompany La E.	this test to a depth of 6000' drilling a 13 1/2 hole to 200' and commuting 10 3/4" Ma.756 enemy with sufficient to will drill a 9 7/8" hole and command 7 5/6" Self on 0' including the main section by stage commuting. We say 5950' with 30 mms. Command will be allowed to an intermediate and 16 hours on oil string. All tested accomming to regulation. Work must receive approval in writing by the Geological Survey before operations may be committed.
propose to drill a proclamate depth of ment to circulate, approximately 135 ment of will be a surface, 36 ment jobs will be a	this test to a depth of 6000' drilling a 13 3/2 hole to 200' and commuting 10 3/4" 32.756 easing with sufficient to will drill a 9 7/6" hole and commut 7 5/6" 256 easing the salt section by stage commuting. We sat 3000' with 300 and. Commut will be allowed to as hours on intermediate and 16 hours on oil string. All tested according to regulation. Work must receive approval in writing by the Geological Survey before operations may be commutable.
