(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

September 15, 1961

Well No. 1 is located 660 ft. from XXX line and 660 ft. from XXX line of sec. 1
SW 1/4 1 21E 37E 10PM
 (1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Hare Lea New Mexico
 (Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 3493 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudlogging jobs, cementing points, and all other important proposed work)

It is our intention to temporarily abandon the McKee producing horizon by setting a mechanical bridging plug at approximately 7275 and capping same with two sacks of cement. It is our intention then to recomplete this well in the Wartz Abo section by perforating several zones over the interval of 7008' to 7213'. Treating this interval in a selective manner with approximately 15,00 gals. of acid.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
