DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill this test to a depth of 6000' drilling an 11" hole and cement 8 5/8" O.D. 2 1/2" casing at approximately 3100' with sufficient cement to circulate. We will cement 5 1/2" O.D. 1 1/2" casing at 5850' with 350 sack. Cement will be allowed to set 36 hours on 8 5/8 and 48 hours on oil string. All cement jobs will be tested according to regulations.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
