FULLERTON OIL COMPANY

Hobbs, New Mexico

October 21, 1952

Box - 2227

New Mexico Oil and Gas
Conservation Commission
Hobbs, New Mexico

Dear Mr. Porter:

Please refer to our "Request for Oil Allowable", Form C-104,
filed on our Elliott #5 well and approved on October 20, 1952.

We would appreciate the allowable on this well being dated
back to October 10, 1952, which is the date the well was com-
pleted. The confusion has arisen because we produced oil into
a test tank located at the well during the testing period from
October 10 to the date of the potential test on October 16,
1952. During the potential test on October 16, 1952 oil was
produced into our permanent tank battery, and we were wrong in
reporting the 16th as being the date first oil was run to tanks.

In view of the above facts, we would appreciate the allowable
being dated October 10, 1952.

Very truly yours

L. W. Jernigan, Office
Manager, Fullerton Oil Co.

New Mexico Oil and Gas
Conservation Commission
Albuquerque, New Mexico

Dear Mr. Pottery:

Please refer to our "Request for Oil Allowable", Form G-104,
filed on our Exhibit 12 well and approved on October 20, 1952.

We would appreciate the allowable on this well being dated
back to October 10, 1952, which is the date the well was com-
pleted. The confusion has arisen because we produced oil from
a test tank located at the well during the testing period from
October 10 to the date of the potential test on October 10,
1952. During the potential test on October 10, 1952 oil was
produced into our permanent tank battery, and we were wrong in
reporting the flow as being the date that oil was not to be taken.

In view of the above issues, we would appreciate the allowable
being dated October 10, 1952.

Very truly yours

L. W. Jenkins, Director
Manager, Petroleum Oil Co.
Box 1231
Albuquerque, New Mexico
