# THE HISTORY OF THE UNITED STATES

## CHAPTER I

The first part of the history of the United States is the story of the discovery of the continent by Christopher Columbus in 1492. This event marked the beginning of European settlement in North America. The second part of the history is the story of the growth of the colonies and the struggle for independence from Great Britain. This period is known as the American Revolution and ended with the signing of the Declaration of Independence in 1776.

The third part of the history is the story of the formation of the United States government. This process began with the signing of the Constitution in 1787 and continued through the early years of the new nation. The fourth part of the history is the story of the expansion of the United States across the continent. This period is known as the westward expansion and ended with the acquisition of the last territory, Alaska, in 1867.

The fifth part of the history is the story of the Civil War, which was fought between the Union and the Confederacy from 1861 to 1865. This war was the result of the struggle over the issue of slavery. The sixth part of the history is the story of the Reconstruction period, which followed the Civil War and ended with the passage of the Reconstruction Act in 1867. This period was a time of great change and growth for the United States.

The seventh part of the history is the story of the Progressive Era, which began in the late 19th century and ended in the early 20th century. This period was a time of great social and economic change. The eighth part of the history is the story of the World War period, which began with the United States' entry into World War I in 1917 and ended with the end of the war in 1918. This period was a time of great global conflict and change.

The ninth part of the history is the story of the Cold War period, which began after World War II and ended with the fall of the Soviet Union in 1991. This period was a time of great international tension and conflict. The tenth part of the history is the story of the modern era, which began in the late 20th century and continues to the present. This period is a time of great technological and social change.

The history of the United States is a story of great achievement and struggle. It is a story of the growth of a young nation from a small group of colonies to a great superpower. It is a story of the triumph of the American dream and the pursuit of freedom and justice for all.
