Gentlemen:

A review of the records for your Curry 1 7-23-37  
in the Wardy Lease Well No. S.T.R.  
Pool, which has a Gas Oil Ratio in excess  
of 100,000-1, indicates that this well should remain in the Wardy  
Oil pool. The Gas Oil Ratio limit in this Pool is 10,000, which  
means that gas production cannot exceed top allowable for the pool multiplied  
by the Gas Oil Ratio limit for the pool.

**Our records reflect that well could also be classified as a Eumont Gas. Well.**

Yours very truly,

OIL CONSERVATION COMMISSION
