

OIL CONSERVATION COMMISSIL  
HOBBS, NEW MEXICO

October 24, 1963

C  
Aztec Oil & Gas Company  
Box 837  
Hobbs, New Mexico

Attention: Mr. Lester Duke

O  
Gentlemen:

P  
Pursuant to our recent conversations concerning the recompletion of your Dauron No. 2 located in Unit A of Section 10, T-21-S, R-37-E, this is to advise that all perforations below 5980 feet extend below the vertical limits of the Wlinebry Pool and cannot be produced in this well.

All forms covering this recompletion are being returned unapproved and can only be approved when the perforations below the above-mentioned point are either squeezed or isolated with a packer.

Y  
In the event that there is oil on hand which was produced from this well during recompletion and testing, I will be agreeable to issuing a testing allowable so that this production can be sold to your transporter.

Yours very truly,

OIL CONSERVATION COMMISSION

Joe D. Ramey
