NOTICE OF INTENTION TO PULL OR ALTER CASING		SUPPLEMENTARY WELL HISTORY	
NOTICE OF INTENTION TO ABANDON WELL			

(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

July 21, 1961

Hawk B-10

Well No. 1 is located 660 ft. from N line and 1980 ft. from W line of sec. 10

NR/4 Sec. 10 (1/4 Sec. and Sec. No.) 21-S (Twp.) 37-E (Range) NMPM (Meridian)

Drinkard (Field) Lea (County or Subdivision) New Mexico (State or Territory)

The elevation of the derrick floor above sea level is 3446 ft. M.S.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudlogging jobs, cementing points, and all other important proposed work)

This well is T.S.D. at the present. We now propose to pull tubing, replace bad tubing, rerun and seat into packer. Treat Drinkard perms with 10,000 gals. of inhibited high viscosity acid using 175 ball sealers. Test well by swabbing. Place tubing plug in tail pipe and proceed with proposed work for Tubb Zone.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Company Continental Oil Company
