The elevation of the derrick floor above sea level is 3404 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudlogging jobs, cementing points, and all other important proposed work)

The designation of W. C. Hawk B-10 No. 5-E, drilled at the above location, has been changed to W. C. Hawk B-10 No. 4-E. The well on this lease which was originally designated as W. C. Hawk B-10 No. 4-E and projected to the Ellanburg pay, was completed on the Holbe pay and was then redesignated as W. C. Hawk B-10 No. 4-S. It then became necessary to redesignate W. C. Hawk B-10 No. 5-E as No. 4-E so that no well number would be missed.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Company Continental Oil Company

Address Box 427

Holbe, New Mexico

By R. Chertusovnik

Title Asst. Dir. Geol.

1. The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that proper record-keeping is essential for the transparency and accountability of the organization. This section also outlines the various methods used to collect and analyze data, ensuring that the information is reliable and up-to-date.

2. The second part of the document focuses on the implementation of the proposed changes. It details the steps involved in the process, from initial planning to final execution. This section also addresses the potential challenges that may arise during the implementation phase and provides strategies to overcome them. The goal is to ensure a smooth transition and successful outcome for the organization.

3. The third part of the document discusses the evaluation and monitoring of the results. It outlines the key performance indicators (KPIs) that will be used to measure the success of the implementation. This section also describes the process for regular monitoring and reporting, ensuring that the organization remains on track and can make adjustments as needed. The final part of the document provides a summary of the findings and conclusions, highlighting the overall impact of the changes.

4. The fourth part of the document discusses the future outlook and recommendations. It provides a clear vision for the organization's future and outlines the key areas for continued improvement. This section also includes recommendations for further research and development, ensuring that the organization remains at the forefront of its field. The final part of the document provides a summary of the findings and conclusions, highlighting the overall impact of the changes.

5. The fifth part of the document discusses the implementation of the proposed changes. It details the steps involved in the process, from initial planning to final execution. This section also addresses the potential challenges that may arise during the implementation phase and provides strategies to overcome them. The goal is to ensure a smooth transition and successful outcome for the organization.

6. The sixth part of the document discusses the evaluation and monitoring of the results. It outlines the key performance indicators (KPIs) that will be used to measure the success of the implementation. This section also describes the process for regular monitoring and reporting, ensuring that the organization remains on track and can make adjustments as needed. The final part of the document provides a summary of the findings and conclusions, highlighting the overall impact of the changes.
