DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is our intention to drill a well with rotary tools at the above location to a total depth of approximately 3120'. All casing points will be cemented in accordance with approved methods of the U. S. Geological Survey and any other requirements will be complied with.

It is planned to use the following casing pattern: 10 3/4" casing to be set at approximately 350' and cemented with 250 sacks cement, cement to be circulated to surface. 7 5/8" casing to be set at approximately 3100' and cemented with approximately 1,000 sacks or sufficient cement to protect the salt section. 5 1/2" casing to be set at total depth and cemented with approximately 625 sacks or as determined by Caliper survey. 5 1/2" casing to be perforated opposite the pay section.

Approval to produce this well upon completion is also requested.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
