Gentlemen:

Re: Dual Completion Application
State 10 No. 2

We forward herewith application in duplicate for permission to effect a Drinkard oil - Blinebry oil dual completion in our State 10 well No. 2 located in Unit E, Section 10, T21S, R37E, Lea County, New Mexico.

This well has for several years been a Blinebry gas - Drinkard oil dual completion under the authorization of Order DC-215. The Blinebry interval recently assumed the characteristics of an oil well and was so re-classified. Such reclassification necessitated the installation of a second tubing string and the obtaining of a revised dual completion order.

Two copies of the application are being furnished your Hobbs Office by carbon copy of this letter. Offset operators are being furnished a copy of the application with copy of this letter
