Gentlemen:

As you know, your recently submitted gas-liquid ratio test on your Blinebry Gas Unit No. 1 located in Unit 0 of Section 10, T-21-S, R-37-E will reclassify this well as an oil well in the Blinebry Oil Pool. This reclassification will be effective July 1, 1963 and your gas allowable will be cancelled as of that date.

Before an oil allowable can be assigned this well, it will be necessary to revise the down-hole equipment on your dual completion in that the Blinebry zone is now producing through the tubing-casing annulus, and our Rules prohibit annular flow for oil wells. An oil allowable will be assigned this well when this office has been notified of this equipment change.

Yours very truly,

OIL CONSERVATION COMMISSION
