

Memo

from CK.

Mr. Helen.

I have given OK to WO
of this well —

Humble (Midland) will send DC
application to SF sometime.

I told them that they can
receive an allowable on one
side of the well when they get a
DC conn and send us the 104,
110 and gas well plat, but must
have DC order for production +/
both sides —
not allow w/o hearing 100 ac.
