(DATE)

GENTLEMEN:

FOLLOWING IS A NOTICE OF INTENTION TO DO CERTAIN WORK AS DESCRIBED BELOW AT THE

Humble Oil & Refining Company N. M. State V WELL NO. 1 IN M
(COMPANY OR OPERATOR) (UNIT)
10 1/4 OF SEC. 10 T. 21-S, R. 37-W NMPAL, Blinebry-Drinkard POOL
(10-ACRE SUBDIVISION)
Lea COUNTY

FULL DETAILS OF PROPOSED PLAN OF WORK
(FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS)

It is proposed to plug off the Drinkard zone by setting a Pressure Services, Inc. TSP Blanking plug in the tubing at 6554 feet. This will permit flowing the Blinebry zone on the tubing side through a circulating sleeve at 6484 feet. There is a circulating sleeve at 6586 feet for shutting off the Drinkard zone but this sleeve has developed a leak. After setting the blanking plug, the tubing will be tested with oil at 1000 psi. Test pressure at the tool will be 3300 psi, or more than twice the Blinebry zone shut-in pressure of 1300 psi. Drinkard zone completion interval is from 6625 to 6658 feet and Blinebry zone is from 5710 to 5850 feet. A Baker Model D packer is set at 6522 feet.
