Hobbs, New Mexico

Attention: Mr. R. R. Alworth

Gentlemen:

Reference is made to your letter of April 3, 1962, requesting administrative approval to drill and complete your N. M. State "V" Well No. 12 as a tubingless completion utilizing a 2 7/8-inch casing string.

Inasmuch as no particular problems causing waste or the violation of correlative rights should occur as the result of this proposed 6000 foot tubingless completion, and also since you propose to cement the 2 7/8-inch casing back into the intermediate string, this office has no objection to your proposal.

Administrative approval of the proposed tubingless completion is therefore hereby given.

Very truly yours,

A. L. PORTER, Jr.,
Secretary-Director

Re: Request to Drill and
Complete Humble's
New Mexico State "V"-12
Utilizing 2-7/8-inch
Oil String Casing
(Slim-Hole Completion)

New Mexico Oil Conservation Commission
Box 871
Santa Fe, New Mexico

Attention: Mr. A. L. Porter, Secretary-Director

Dear Mr. Porter:

Humble Oil and Refining Company requests Administrative approval to drill and complete its New Mexico State "V"-12 as a "slim-hole" completion utilizing 2-7/8-inch oil string casing.

This proposed well is located in Unit L, Section 10, T-21-S, R-37-E, Lea County, New Mexico. It will be completed in the Blinebry Oil Pool. Other Blinebry Oil wells on this lease and the immediate vicinity indicate no particular problem to this type completion.

It is proposed to set 10-3/4-inch surface casing at approximately 300 feet, cement it to the surface; 7-5/8-inch casing at approximately 3000 feet, cement it back into salt section at approximately 2500 feet, fulfilling all requirements outlined in Rule 107. The hole will be drilled and cored to approximately 6000 feet in the Blinebry Oil zone and completed through 2-7/8-inch oil string casing cemented back to the intermediate string.

Exception to Rule 107-E is respectfully requested.

Yours very truly,

HUMBLE OIL & REFINING COMPANY
