The following table provides a summary of the data collected during the experiment. The data shows a clear trend of increasing values over time, which is consistent with the theoretical model proposed in the introduction.

Table 1: Summary of Data

The data was collected over a period of 10 days, with measurements taken at intervals of 2 hours. The results show a steady increase in the measured quantity, with some minor fluctuations observed in the later stages of the experiment.

The following table provides a detailed breakdown of the data for each day of the experiment.

Table 2: Detailed Data

The data shows a clear trend of increasing values over time, which is consistent with the theoretical model proposed in the introduction.
