

Attachment to Notice of Intention to Change Plans
Hawk B-3 No. 22

The original location of this well was spudded on 7-30-62. 9 5/8" casing was set at 1370' W/500 sacks cement and circulated. Casing was tested W/1000 lbs and tested O.K. On 8-6-62 surface casing parted and attempts to rejoin same have been unsuccessful. Went in hole W/mill and stuck, shot off drill pipe at 1317'. Set cement plug from 1317-1246'. Will P & A and move to new location. The original designation was Hawk B-3 No. 21.

It is our intention to drill a well at the above location to a TD of approximately 2400' with rotary tools in order to develop Blinberry, Tubb and Ufford oil prospects on this lease. All casing points will be cemented in accordance with approved methods of the USCS and any special requirements will be followed.

It is planned to use the following casing pattern: 9 5/8" surface string to be set at 1375' and cemented with 500 sacks cement. Cement circulated to circulate. 7" production string to be set at 6750' and cemented with 450 sacks cement. Cement is calculated to return to 2400'.

Approval to produce this well upon completion is also requested.
