**Continental Oil Company
Mr. R. C. Lannen
Eunice, New Mexico**

Dear Sir:

Reference is made to your request for permission to exempt your Hawk "B-3" Well No. 1 T-B from the regular Terry-Blinbry Bottom Hole Pressure Survey in April 1955.

This is to inform you that your Hawk "B-3" Well No. 1 T-B, located in Lot 1, 660 feet from the North and East lines of Section 3, Township 21 South, Range 37 East, NMPM, Lea County, New Mexico, is hereby exempt from the April 1955 Bottom Hole Pressure Survey, in view of the production difficulty such test would cause.

Very truly yours,

**W. B. Macey
Secretary-Director**

WBM:jh

Figure 6. The effect of the number of iterations on the accuracy of the proposed algorithm. The figure shows two plots. The top plot shows the accuracy of the proposed algorithm versus the number of iterations for different values of α (0.1, 0.2, 0.3, 0.4, 0.5). The bottom plot shows the accuracy of the proposed algorithm versus the number of iterations for different values of β (0.1, 0.2, 0.3, 0.4, 0.5).

Bottom Photo Presses Review in April 1968.
your name, "B-3" with no. 1 T-B from the regular Terry-Blindey
reference is made to your request for permission to exhibit

This is to inform you that our Hawk 10-3 Well No. 1-2-B, located in Lot 1, 400 feet from the 1/2 inch and 1/4 inch of section 1, Township 21 North, Range 37 East, NMPA, 4th County, New Mexico, is hereby exempt from the April 1965 Bottom Hole Pressure Survey. In view of the production difficulty such test would cause.

ATTN: Mr. Stanley J. Stanley

SUBJECT: BOTTOM HOLE PRESSURE SURVEY TERRY BLINEBRY POOL - APRIL 1955

Concerning the above subject the Continental Oil Company requests permission to exempt its Hawk B-3 Well No. 1 T-B from the survey. The following information is submitted for the well in lieu of this survey:

Pool	Terry Blinebry
Lease & Well	Hawk B-13 No. 1 T-B
Date	2-5-55
Static BHP	1702 psi corrected to BHT 100 degrees F @ datum - 2400'.
Shut in time	48 hours

Considerable expense and difficulty have been encountered in maintaining this well on natural flow and severe production losses have been suffered. At present the well is flowing on a positive choke and the characteristics are such that as long as the well is not shut in or tampered with natural flow can be maintained successfully.

Figure 1. The effect of the concentration of the *Agrobacterium* suspension on the transformation efficiency of *Agrobacterium* strains.

1. The following table shows the number of people who visited the museum in each month from January to December.

Journal of Interpersonal Violence 26(10) 1978-1997

1. The first step is to identify the problem or question that needs to be answered.

1. The first step is to identify the problem. This involves understanding the current situation and the goals that need to be achieved.

Figure 1. The effect of the concentration of the H_2O_2 solution on the amount of the released H_2 gas from the H_2 gas-generating system. The amount of the released H_2 gas was measured at 25°C for 10 min. The concentration of the H_2O_2 solution was 0.01, 0.02, 0.05, 0.1, 0.2, 0.5, 1, 2, 5, 10, 20, 50, 100, 200, 500, 1000, and 2000 ppm. The amount of the released H_2 gas was measured at 25°C for 10 min. The concentration of the H_2O_2 solution was 0.01, 0.02, 0.05, 0.1, 0.2, 0.5, 1, 2, 5, 10, 20, 50, 100, 200, 500, 1000, and 2000 ppm.
