

That the acreage to be dedicated to the well will be 120 acres described as Lots 6, 10 and 11 of Section 3-21S-37E.

- (e) That the dual completion of this well will be in the interest of conservation and the protection of correlative rights and the mechanics of the dual completion are feasible and practical.
- (f) That the applicant will comply with all rules and regulations of the New Mexico Oil Conservation Commission to maintain separation of production from the two pay zones.
- (g) That by copy of this letter of application, all offset operators are notified of the proposed dual completion in accordance with Rule 112-A (c).

Therefore, Shell Oil Company requests that the Oil Conservation Commission grant permission to the applicant to dually complete the subject well as proposed in this application.

I hereby certify that the information given above is true and complete to the best of my knowledge.

Respectively submitted,

Shell Oil Company

My Commission Expires:

September 16, 1958

(f) That the company to be dedicated to this will be  
120 acres described as Lots 6, 10 and 11 of Section  
1-22-37E.

(g) That the dual completion of this well will be in the  
interest of conservation and the protection of conser-  
vative rights and the mechanics of the dual completion  
are feasible and practical.

(h) That the applicant will comply with all rules and reg-  
ulations of the New Mexico Oil Conservation Commission  
to restrain separation of production from the two pay  
zones.

(i) That a copy of this letter of application, all off-  
set operators are notified of the proposed dual  
completion in accordance with Rule 113-1 (c).

Therefore, Shell Oil Company requests that the Oil Conservation  
Commission grant permission to the applicant to finally complete the subject  
well as proposed in this application.

I hereby certify that the information given above is true and cor-  
rect to the best of my knowledge.

Respectfully submitted,

Shell Oil Company

Subject: Application by Shell Oil  
Company to dually complete  
Taylor-Glenn 1, Drinkard  
Oil and Blinebry Gas,  
Lea County, New Mexico

New Mexico Oil Conservation Commission  
P. O. Box 871  
Santa Fe, New Mexico

All of the 120 Ac (lots 6, 10 & 11)  
are now in Terry  
Blinebry oil Pool

Gentlemen:

By this letter of application Shell Oil Company wishes to state  
the following:

- (a) That Shell Oil Company Taylor-Glenn 1, located 3226' FNL and 1980' FWL of Section 3-21S-37E, Lea County, New Mexico, was completed March 1, 1948, at a plugged back depth of 6720'. The attached Exhibit A shows the location of this well together with the location of all offset wells.
- (b) That the subject well has 5 1/2" casing set at 8060 feet and cemented with 675 sacks of cement. The well is an oil well producing from the perforated interval 6625' - 6715' (gross interval) in the Drinkard Field.
- (c) That the applicant proposes to dually complete the well in the following manner as shown by the attached Exhibit B:
  - 1. Perforate the 5 1/2" casing within the approximate interval 5625' - 5850' in the Blinebry formation of the Blinebry Gas Pool.
  - 2. Set production type packer below these perforations at approximately 6550 feet to separate the two pay zones.
  - 3. Produce the Drinkard oil through the tubing and the Blinebry gas through the tubing-casing annulus.

Subject: Application by Shell Oil Company to drill complete Taylor-Glenn I, Drinkard Oil and Blinberry Gas, Las County, New Mexico

New Mexico Oil Conservation Commission  
 P. O. Box 871  
 Santa Fe, New Mexico

Commission:

By this letter of application Shell Oil Company wishes to state the following:

- (a) That Shell Oil Company Taylor-Glenn I, located 3226' T&E and 1980' T&E of section 3-212-37E, Las County, New Mexico, was completed March 1, 1936, at a plugged back depth of 6720'. The attached Exhibit A shows the location of this well together with the location of all offset wells.
- (b) That the subject well has 2 1/2" casing set at 2000 feet and cemented with 675 sacks of cement. The well is an oil well producing from the perforated interval 6625' - 6725' (gross interval) in the Drinkard field.
- (c) That the applicant proposes to drill complete the well in the following manner as shown by the attached Exhibit B:
  1. Perforate the 2 1/2" casing within the appropriate interval 6625' - 6850' in the Blinberry formation of the Blinberry Gas Pool.
  2. Set production type packer below these perforations at approximately 6350 feet to separate the two pay zones.
  3. Produce the Drinkard oil through the tubing and the Blinberry gas through the tubing-casing annulus.
