SUBSEQUENT REPORT OF:

(other) T.A. Blinebry & Test Tubb

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Please disregard the Sundry Notice for the subject well dated 10-21-82 to abandon the Blinebry and restore the Tubb formation. A squeeze procedure will not be performed. The well is presently a Blinebry oil well. It is proposed to shut-in the Blinebry for approximately 2 months and test the Tubb formation. A permanent production packer will be set at 5970' between the existing Blinebry and Tubb perms. The Blinebry will remain shut-in if Tubb production is commercial.

Subsurface Safety Valve: Manu. and Type _____ Set @ _____ Ft.
