DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is intended to drill a well with rotary tools at the above location to a total depth of approximately 7850'. All casing will be cemented in accordance with approved methods of the U. S. Geological Survey and any other special requirements will be complied with.

It is planned to use the following casing pattern: 13 3/8" casing to be set at approximately 250' and cemented with 250 sacks cement to be circulated to surface; 9 5/8" casing to be set at approximately 3150' and cemented with 1465 sacks or sufficient cement to protect the salt section; 7" casing to be set at total depth and cemented with 730 sacks or the required amount as determined by caliper survey. Casing to be perforated opposite the pay zone.

Approval to produce this well upon completion is also requested.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
