The elevation of the derrick floor above sea level is \_\_\_\_\_ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is intended to drill a well with rotary tools at the above location to a total depth of approximately 6100'. All casing will be cemented in accordance with approved methods of the U. S. Geological Survey and any other special requirements will be complied with.

It is planned to use the following casing pattern: 10 3/4" OD casing to be set at approximately 250' and cemented with approximately 250 sacks cement, cement to be circulated to surface; 7 5/8" OD casing to be set at approximately 3150' and cemented with approximately 1045 sacks of cement, exact amount to be determined by caliper survey; 5 1/2" OD casing to be set at approximately 5550' and cemented with approximately 625 sacks, exact amount to be determined by caliper survey.

I understand that the well is to be produced upon completion and is also requested.

Title District Superintendent

1. The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that this is crucial for ensuring the integrity of the financial system and for providing a clear audit trail.

2. The second part of the document outlines the various methods used to collect and analyze data. It describes how different types of information are gathered and how they are processed to identify trends and patterns.

3. The third part of the document focuses on the results of the analysis. It presents the findings of the study and discusses the implications of these results for the future of the field.

4. The fourth part of the document provides a summary of the key points discussed in the previous sections. It highlights the main conclusions and offers suggestions for further research.

5. The fifth part of the document contains a list of references to the sources used in the study. This includes books, articles, and other documents that have been consulted during the research process.

6. The sixth part of the document is a conclusion that summarizes the overall findings of the study. It reiterates the importance of the research and provides a final statement on the significance of the results.

7. The seventh part of the document is a list of appendices. These include additional data, charts, and other information that supports the main text of the document.

8. The eighth part of the document is a list of figures. These are visual representations of the data that are used to illustrate the findings of the study.
