January 28, 1964

Oil Conservation Commission
P. O. Box 1980
Hobbs, New Mexico

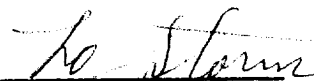

Dear Sirs:

For your information we enclose one copy of the 1" = 100' reduction of the original electrical log run on J. R. Cone (formerly Markham, Cone & Redfern) Eubanks Well No. 2 in the Drinkard Pool. This log is being supplied in support of our Application of January 17, 1964 for administrative approval to recompleate the well as a Blinebry Oil over Tubb Gas dual.

It is our intention to run gamma ray/neutron and cement bond logs in conjunction with the proposed recompletion. Copies of these latter logs will be filed with your office if the recompletion is approved and executed as proposed.

Yours very truly

J. R. CONE
