DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudlogging jobs, cementing points, and all other important proposed work)

It is intended to drill a well with rotary tools at the above location to a total depth of approximately 6740' or to a depth sufficient for completion in the Brinkard formation. All casing will be cemented in accordance with approved methods of the U. S. Geological Survey and any other special requirements will be complied with.

It is planned to use the following casing pattern: 13 3/8" casing to be set at approximately 250' and cemented with 250 sacks cement to be circulated to surface; 9 5/8" casing to be set at approximately 3150' and cemented with 1400 sacks or sufficient cement to protect the salt section; 7" casing to be set at total depth and cemented with 500 sacks or the required amount as determined by caliper survey. Casing to be perforated opposite the pay zone.

Approval to produce this well upon completion is also requested.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Title Plant Superintendent

1. The first part of the paper discusses the importance of the study of the history of the United States. It is argued that a knowledge of the past is essential for a full understanding of the present and for the development of a sound perspective on the future. The author points out that the study of history is not merely a collection of facts and dates, but a process of critical thinking and analysis.

2. The second part of the paper discusses the role of the individual in the history of the United States. It is argued that the actions of individuals, particularly those of the founding fathers, have shaped the course of the nation's history. The author points out that the study of the lives of these individuals is essential for a full understanding of the history of the United States. The author also points out that the study of the lives of these individuals is not merely a collection of facts and dates, but a process of critical thinking and analysis.

3. The third part of the paper discusses the role of the government in the history of the United States.

4. The fourth part of the paper discusses the role of the people in the history of the United States.

5. The fifth part of the paper discusses the role of the future in the history of the United States.
