DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is intended to drill this well with rotary tools at the above location to an approximate TD of 5875'. Casing will be cemented in accordance with U.S.G.S. standards and other special requirements will be complied with.

The following casing pattern is planned: 8 5/8" OD at 1400' with 700 sacks cement, cement to be circulated to surface, 5 1/2" OD casing set at 5875' with 1000 sacks cement. Depths and number of sacks of cement are approximate. Exact amount of cement will be determined by caliper survey.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
