Re: 80 acre non-standard gas spacing and proration unit
State "S" Well No. 4
Hare-San Andres Gas Pool
Lea County, NM

Dear Mr. Stogner,

Texaco Exploration and Production Inc. respectfully requests administrative approval to produce the State "S" No. 4 on a non-standard 80 acre gas spacing and proration unit in the Hare-San Andres pool. This request supersedes our previous request for a non-standard 160 acre proration unit for the same well submitted July 11, 1995 (Case Number 11366). The 160 acre proration unit could not be approved administratively because the acreage crossed into two quarter sections. The revised proposal dedicates the N/2 NW/4 of Section 15, Township 21-S, Range 37-E for this completion. The well will be plugged back from the current completion in the Brunson Ellenburger pool and recompleted into the Hare-San Andres interval.

There were no objections received from offset operators on the previous 160 acre submittal. A copy of the original map of the subject well with offset tracts, ownership, and wells is attached along with the revised proposed acreage plat (C-102). Thank you for your cooperation and consideration pertaining to this revised submittal.

Sincerely,

Daniel A. Dunham
Operations Engineer

Dear Mr. Carriger:

It has been determined subsequent to our initial evaluation of your application dated July 11, 1995 (received by the Division on July 14, 1995) that the provisions governing the Hare-San Andres Gas Pool does not permit the Division to process the subject application administratively since the proposed acreage dedication (to comprise the N/2 N/2 of said Section 15) crosses over into two quarter sections, see Division General Rule 104.D(2)(a)(ii).

This application will be placed on the next available Examiners Hearing docket scheduled for August 24, 1995. Further, you as applicant must provide adequate notice of this matter pursuant to all applicable provisions of Division General Rule 1207.A(6).
