> Re: Applicition for Approval to Bual - Complete, Mid-Continent Petroleum Corporation, State Land "15" Well No. 3, Drinkard Field, Los County, New Nexico.

Gentlemen:

Mid-Continent Petroleum Corporation hereby makes application to Dual-Complete the above well which is now completed as an eil well in the Drinkard Field, Lea County, New Mexico. This well, leested in the center of SW/4 of SE/4, Unit 0, Sec. 16, T-21-8, R-37-E was completed June 12, 1947 at a total depth of 6660'. 5%" GD Casing was set at 6659' and communed with 500 sacks of comment. Production was obtained from the Brinkard pay some through casing perforations from 6540' to 6635'. The attached plat shows the subject lease and well, together with the locations of all effect wells.

We propose to chally complete the well in the following manner as indicated on the attached schematic diagram:

- (1) Perforate the 5%" Gasing within the approximate interval of 5550' to 5750' in the Blinebry Gas Pool.
- (2) Set production type packer below these perforations at approximately 6500' to separate the Blinebry and Brinkard pay somes.
- (3) Produce the Brinkard oil through the tubing and the Blinebry gas through the tubing - casing annulus.

We are firmly convinced that the manner and method of this proposed dual completion is mechanically feasible and practicable and that we can comply with all rules and regulations of the New Mexico Oil and des Conservation Commission pertaining to this application.
