RE: Application for Multiple
Completion
TEXACO Inc.
Mittie Weatherly Well No. 1

ATTN: Mr. A. L. Porter, Jr.

Gentlemen:

Your approval to multiply complete Texaco's Mittie Weatherly Well No. 1, located in Unit F, Sec. 17, T-21-S, R-37-E, Lea County, in the Drinkard and Penrose Skelly Pools is requested. The subject well was completed in the Drinkard Formation, and a workover has been performed to open the Penrose Skelly Grayburg Section. Your approval is requested for the dual completion of these zones.

Offset operators are today being notified by copy of this application.

Yours very truly,

Q. V. Thannon

1. *Chlorophyll a* and *Chlorophyll b* were determined by the method of Arar and Collins (1971) using a Shimadzu 1601 UV-Visible Spectrophotometer.

DISCUSSION

1. The first of these is the fact that the majority of the population of the United States is of European descent. This is a fact which is often overlooked in discussions of the Negro problem. The Negro population is a small minority in a country where the vast majority of the people are of European descent. This fact is of great importance in understanding the Negro problem in the United States.

1. The first step is to identify the problem or question that needs to be answered. This involves understanding the context and the specific requirements of the task.

[illegible]

the 1990s, the number of people in the world who are under 15 years of age is expected to increase by 1.5 billion, from 1.1 billion in 1990 to 2.6 billion in 2010. The number of people aged 65 and over is expected to increase by 1 billion, from 350 million in 1990 to 1.4 billion in 2010. The number of people aged 15-64 is expected to increase by 1.5 billion, from 2.5 billion in 1990 to 4.0 billion in 2010. The number of people aged 65 and over is expected to increase by 1 billion, from 350 million in 1990 to 1.4 billion in 2010. The number of people aged 15-64 is expected to increase by 1.5 billion, from 2.5 billion in 1990 to 4.0 billion in 2010.
