

- (h) In that the A.P.I. gravities of the two crudes are so nearly the same and both classified as intermediate grade, it can readily be ascertained that the value of the commingled production will not be less than the sum of the values of the individual streams.
- (i) All offset operators and the United States Geological Survey have been notified in writing of this proposed commingling.

By granting administrative approval of this application waste will not result thereby, and correlative rights will not be violated. Should the Secretary-Director of the Commission see fit to grant this application it is requested that production of oil & gas from this well, respectfully, be allocated as follows: Tubbs - 20% & 6%; Blinberry - 80% & 94%.

Very truly yours,

(For J. H. Peery)
Joe H. Campbell
Petroleum Engineer

- (1) All oil and gas operators and the United States Geological Survey have been notified in writing of this proposed proceeding.
- (2) In that the U. S. Geological Survey has no means of determining the value of the oil and gas in the same and has classified as "undiscovered" those in which the value of the oil and gas is not known, it is requested that the value of the oil and gas in the same be ascertained and that the sum of the value of the oil and gas in the same be not less than the sum of the value of the oil and gas in the same.

by granting administrative approval of this application. It is requested that the Secretary of the Commission see fit to grant this application as requested that production of oil and gas from this well, respectively, be allocated as follows: 50% to the U. S. Geological Survey and 50% to the U. S. Geological Survey.

Very truly yours,

(Signature)
 Director, U. S. Geological Survey
