Re: Addition of Drinkard zone and downhole commingle with Blinbry
and Tubb per Amended DHC-285
Lockhart #2-M Sec. 17, T21S, R37E

Gentlemen:

According to the recently received gas/oil ratio test the Drinkard zone has been opened in the above-referenced well and downhole commingled with the Blinbry and Tubb zones as authorized by amended DHC-285.

In order that we may complete the assignment of an allowable to the Drinkard zone in this well, please complete all sections of a C-104 for the Drinkard. Use only the portion of the production attributed to the Drinkard zone as your test.

As soon as we receive the C-104 we will get an allowable assigned to the Drinkard.

Very truly yours,

OIL CONSERVATION DIVISION

Jerry Sexton
Supervisor, District I
