Mr E. J. Fischer
Engineer, District 1

Dear Mr Fisher,

In your letter dated April 22, 1957
you mention a discrepancy in our gas oil
ratio figures. Our records show these figures
as follows Oil production 90 BPD, Gas 175.5
MCFPD, GOR 1950. This test was conducted
after fracturing our well as the attached form indicates.

Subsequent testing on 1/8" choke gives Oil 73 BPD
gas 135.0 MCFPD. GOR 1850.

If this does not answer your question,
please advise + we'll furnish any additional information.

Very truly yours,

A. Hedrick, Jr.
