Re: Proposed NSP _____
Proposed NSL _____
DC 635

Gentlemen:

I have examined the application dated _____
for the R. Olsen Oil Co. State "B" #1 18-21-37
Operator Lease and Well No. S-T-R

and my recommendations are as follows:

Need control eqipt. (i.e. circulating sleeves, side door choke or other) for
complete control of isolation—E.J.F.

Geologically O.K.—J.W.R.

Yours very truly,

OIL CONSERVATION COMMISSION

Engineer

1. The first part of the document discusses the importance of maintaining accurate records of all transactions and the role of the accounting system in providing reliable financial information.

2. The second part of the document describes the various methods used to collect and analyze data, including surveys, interviews, and focus groups.

3. The third part of the document outlines the steps involved in the research process, from identifying the research problem to drawing conclusions.

4. The fourth part of the document discusses the ethical considerations that must be taken into account when conducting research.

5. The fifth part of the document describes the various types of research designs that can be used to study different phenomena.

6. The sixth part of the document discusses the importance of sample size and the methods used to determine it.

7. The seventh part of the document describes the various methods used to collect data, including surveys, interviews, and focus groups.

8. The eighth part of the document outlines the steps involved in the research process, from identifying the research problem to drawing conclusions.

9. The ninth part of the document discusses the ethical considerations that must be taken into account when conducting research.

10. The tenth part of the document describes the various types of research designs that can be used to study different phenomena.

11. The eleventh part of the document discusses the importance of sample size and the methods used to determine it.

12. The twelfth part of the document describes the various methods used to collect data, including surveys, interviews, and focus groups.

13. The thirteenth part of the document outlines the steps involved in the research process, from identifying the research problem to drawing conclusions.

14. The fourteenth part of the document discusses the ethical considerations that must be taken into account when conducting research.

15. The fifteenth part of the document describes the various types of research designs that can be used to study different phenomena.

16. The sixteenth part of the document discusses the importance of sample size and the methods used to determine it.

17. The seventeenth part of the document describes the various methods used to collect data, including surveys, interviews, and focus groups.

18. The eighteenth part of the document outlines the steps involved in the research process, from identifying the research problem to drawing conclusions.

19. The nineteenth part of the document discusses the ethical considerations that must be taken into account when conducting research.

20. The twentieth part of the document describes the various types of research designs that can be used to study different phenomena.

21. The twenty-first part of the document discusses the importance of sample size and the methods used to determine it.

22. The twenty-second part of the document describes the various methods used to collect data, including surveys, interviews, and focus groups.

23. The twenty-third part of the document outlines the steps involved in the research process, from identifying the research problem to drawing conclusions.

24. The twenty-fourth part of the document discusses the ethical considerations that must be taken into account when conducting research.

25. The twenty-fifth part of the document describes the various types of research designs that can be used to study different phenomena.

26. The twenty-sixth part of the document discusses the importance of sample size and the methods used to determine it.

27. The twenty-seventh part of the document describes the various methods used to collect data, including surveys, interviews, and focus groups.

28. The twenty-eighth part of the document outlines the steps involved in the research process, from identifying the research problem to drawing conclusions.

29. The twenty-ninth part of the document discusses the ethical considerations that must be taken into account when conducting research.

30. The thirtieth part of the document describes the various types of research designs that can be used to study different phenomena.

31. The thirty-first part of the document discusses the importance of sample size and the methods used to determine it.

32. The thirty-second part of the document describes the various methods used to collect data, including surveys, interviews, and focus groups.

33. The thirty-third part of the document outlines the steps involved in the research process, from identifying the research problem to drawing conclusions.

34. The thirty-fourth part of the document discusses the ethical considerations that must be taken into account when conducting research.

35. The thirty-fifth part of the document describes the various types of research designs that can be used to study different phenomena.

36. The thirty-sixth part of the document discusses the importance of sample size and the methods used to determine it.

37. The thirty-seventh part of the document describes the various methods used to collect data, including surveys, interviews, and focus groups.

38. The thirty-eighth part of the document outlines the steps involved in the research process, from identifying the research problem to drawing conclusions.

39. The thirty-ninth part of the document discusses the ethical considerations that must be taken into account when conducting research.

40. The fortieth part of the document describes the various types of research designs that can be used to study different phenomena.

41. The forty-first part of the document discusses the importance of sample size and the methods used to determine it.

42. The forty-second part of the document describes the various methods used to collect data, including surveys, interviews, and focus groups.

43. The forty-third part of the document outlines the steps involved in the research process, from identifying the research problem to drawing conclusions.

44. The forty-fourth part of the document discusses the ethical considerations that must be taken into account when conducting research.

45. The forty-fifth part of the document describes the various types of research designs that can be used to study different phenomena.

46. The forty-sixth part of the document discusses the importance of sample size and the methods used to determine it.

47. The forty-seventh part of the document describes the various methods used to collect data, including surveys, interviews, and focus groups.

48. The forty-eighth part of the document outlines the steps involved in the research process, from identifying the research problem to drawing conclusions.

49. The forty-ninth part of the document discusses the ethical considerations that must be taken into account when conducting research.

50. The fiftieth part of the document describes the various types of research designs that can be used to study different phenomena.
