

5. Attached diagrammatic sketch of proposed dual completion equipment showing:
  - (a) Formation involved.
  - (b) Perforations.
  - (c) Approximate location of packer.
  - (d) Other information pertinent to dual completion.
6. Details of Recompletion:

The subject well is currently completed as an oil well in the Grayburg formation. It is planned to perforate and stimulate the Queen formation and complete the well as a gas-oil dual.
7. The proposed non-standard gas proration unit of 80 contiguous acres consists of the S/2 of the SW/4 of Section 18, T-21-S, R-37-E.
8. The proposed non-standard gas proration unit lies wholly within a single governmental section.
9. The entire proposed non-standard gas proration unit may reasonably be presumed to be productive of gas.
10. The length or width of the proposed non-standard gas proration unit does not exceed 5280'.
11. All operators who offset the lease containing location of the subject well have been furnished a copy of this application by registered mail. Attached is mailing list of all operators notified.

Yours very truly,

R. OLSEN OIL COMPANY
