RE: Proposed Recompletion
Dayton Hardy #2
Unit I, Sec. 20, T21S, R37E

Gentlemen:

We have this date approved the proposed recompletion of the above-referenced well from the Paddock to the Tubb and Blinebry Pools. However, before this well can be produced from the Blinebry Pool it will be necessary for Texaco to get approval of an 80-acre non-standard proration unit for their D.C. Hardy Gas Unit #5 (P-20-21-37), since your well, the Hardy #2, lies within their 160-acre proration unit.

Very truly yours,

OIL CONSERVATION DIVISION

Jerry Sexton (ed)
