DateOIL CONSERVATION COMMISSION,
Santa Fe, New Mexico.

Gentlemen:

Following is a notice of intention to do certain work as described below at the

Continental Oil Company Mary E. Wantz Well No. 1-D in SW/4
Company or Operator Lease
of Sec. 21, T. 21-S, R. 37-E, N. M. P. M., Drinkard Field.
Lea County.

FULL DETAILS OF PROPOSED PLAN OF WORK

FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS OF THE COMMISSION

This well was originally completed 9-27-47 at total depth of 6649' in Lime for initial potential of 154 bbls. oil in 7 hours flowing through 1" choke on 2 1/2" tubing, GOR 153. The well stopped flowing and was acidized with 5,000 gallons through perforations 6604-6644'. The well still would not flow its production and 7" casing was perforated 6587-6595' with 64 shots, 6560-6570' and 6575-6582' with 136 shots. These perforations were acidized with 1,000 gallons, following which the well swabbed 56 bbls. oil, no water, in 11 hours, but still would not flow.

It is planned to deepen this well approximately 40' from its present depth of 6649' and test in an attempt to obtain flowing production.
