The Wantz #2 was shut-in as of July of 1981, due to lack of production (see attached "New Mexico Oil & Gas Engr. Comm. Annual Report"). In May of 1982, it was placed on pump again to test, however, the tubing parted and the well was shut-in again.

With your permission, we intend to pump this well once more, in order to determine if producing this well is economically justifiable. If not, the pumping unit will be moved to the Mittie Weatherly #1E (S-21-T21S-R-37E). A subsequent C-103 will follow.

I hereby certify that the information above is true and complete to the best of my knowledge and belief.
