

## OIL CONSERVATION COMMISSION

SANTA FE, NEW MEXICO

## Miscellaneous Reports on Wells

RECEIVED  
DEC - 4 1950  
OIL CONSERVATION COMMISSION  
SANTA FE, NEW MEXICO

Submit this report in triplicate to the Oil Conservation Commission or its proper agent within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of casing shut off, result of plugging of well, and other important operations, even though the work was witnessed by an agent of the Commission. Reports on minor operations need not be signed and sworn to before a notary public. See additional instructions in the Rules and Regulations of the Commission.

Indicate nature of report by checking below.

REPORT ON BEGINNING DRILLING OPERATIONS		REPORT ON REPAIRING WELL	
REPORT ON RESULT OF SHOOTING OR CHEMICAL TREATMENT OF WELL		REPORT ON PULLING OR OTHERWISE ALTERING CASING	
REPORT ON RESULT OF TEST OF CASING SHUT-OFF		REPORT ON DEEPENING WELL	
REPORT ON RESULT OF PLUGGING OF WELL		24 hr shut in pressure

# THEORY OF THE EARTH

## CHAPTER I. OF THE ORIGIN OF THE EARTH.

The origin of the earth is a subject which has occupied the minds of philosophers from the earliest ages. The ancients were divided into two schools, the one of which held that the earth was created out of nothing, and the other that it was formed out of pre-existing matter. The former school was called the *creatio ex nihilo*, and the latter the *creatio ex materia*.

The modern philosophers have generally adopted the latter opinion.

They have supposed that the earth was formed out of a mass of gas, which was condensed into a solid body by the action of heat. This process is called *condensation*, and is the same as that which takes place in the formation of clouds and rain.
