(Give location from section or other legal subdivision lines. Cross out wrong directions.)

If state land the oil and gas lease is No. A 986

Assignment No. 5

If patented land the owner is State Land

Address _____

The lessee is Cranfill-Reynolds & L A New Mex. Box 607 Cisco, Texas

The elevation of the derrick floor above sea level is ? feet. We propose to drill well with no cable tools

Make of Drill _____

We propose to use the following strings of casing and to land or cement them as indicated.

Size of Casing	Weight Per Foot	New or Second Hand	Depth	Landed or Cemented
Well will be commenced of sufficient size to permit shutting off of surface water with twenty-inch casing. Lower water flows will be shut off as required. Salt and other mineral formation will be protected as required by you but sufficient data is not available at this time to give even approximate landing stages for casing				

If changes in the above plan become advisable we will notify you before cementing or landing casing. We estimate that the first productive oil or gas sand should occur at a depth of about _____ feet.
