FULL DETAILS OF PROPOSED PLAN OF WORK

FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS OF THE COMMISSION

We propose to deepen our J. P. Alexander "B" #2 well from present TD (8077') to 10,000' or to impenetrable formation, unless commercial production is encountered at a lesser depth. We propose to drill stem test any stain or porosity in the drilling samples that warrant testing. We plan to run an electric log and a radioactivity log to determine possible pay sections. 5" OD 15# casing will be set at TD and cemented with 500 sacks. The casing will be perforated and the well tested. The Conservation Commission will be notified of any change in the above plan.
