# THEORY OF THE EARTH

## CHAPTER I

### OF THE ORIGIN OF THE EARTH

The origin of the earth is a subject of great interest and importance. It is one of the most ancient and most mysterious of all the questions which have engaged the human mind. The various theories which have been proposed to explain the origin of the earth, and the different views which have been held on this subject, are all founded on conjecture and speculation. The only way in which we can hope to arrive at a true and certain knowledge of the origin of the earth, is by the study of the laws of nature, and by the observation of the phenomena which are connected with the formation of the earth.

### OF THE ORIGIN OF LIFE

The origin of life is another subject of great interest and importance. It is one of the most ancient and most mysterious of all the questions which have engaged the human mind. The various theories which have been proposed to explain the origin of life, and the different views which have been held on this subject, are all founded on conjecture and speculation. The only way in which we can hope to arrive at a true and certain knowledge of the origin of life, is by the study of the laws of nature, and by the observation of the phenomena which are connected with the formation of life.

### OF THE ORIGIN OF MAN

The origin of man is another subject of great interest and importance. It is one of the most ancient and most mysterious of all the questions which have engaged the human mind. The various theories which have been proposed to explain the origin of man, and the different views which have been held on this subject, are all founded on conjecture and speculation. The only way in which we can hope to arrive at a true and certain knowledge of the origin of man, is by the study of the laws of nature, and by the observation of the phenomena which are connected with the formation of man.

### OF THE ORIGIN OF THE HUMAN MIND
