Proposed DC 481

Gentlemen:

I have examined the application dated 7/15/57  
for the E. G. Rodman W. E. Lee et al #4 20-21-37  
Operator Lease and Well No. S-T-R

and my recommendations are as follows:

There is no mention of controls equipment in the well. It will be necessary  
for you to install some sort of control(s) for working on each zone without  
needing to pull tubing. This can be accomplished by installing circulating  
valves above and below packer or by a side door choke above packer—E.J.F.

Yours very truly,
