Re: Application for Dual Completion
in the Elinebry Gas Pool and the
Drinkard Oil Pool for Sinclair's
A. M. York "A" Well No. 1,
Lea County, New Mexico.

Gentlemen:

Sinclair Oil & Gas Company hereby makes application for an Administrative Order under Order No. R-1214 for permission to dually complete their A. M. York "A" Well No. 1 in the Elinebry Gas Pool and the Drinkard Oil Pool, Lea County, New Mexico. We have been advised that the Commission form entitled "Application for Dual Completion" is not available at this time, therefore, we request that we be permitted to present the pertinent well information in letter form as we have in the past. In all other respects we have endeavored to follow the requirements as set out in said Order No. R-1214.

With regard to this dual completion Sinclair wishes to state:

1. Sinclair Oil & Gas Company is the operator of the A. M. York "A" Well No. 1 which is located 330 feet from the East line and 2310 feet from the North line of Section 20-21S-37E, Lea County, New Mexico. This well was completed in the Drinkard formation on November 16, 1947.
2. Subject well is located within the limits of the Elinebry Gas Pool and within the limits of the Drinkard Oil Pool. The Commission has previously authorized dual completion of wells in the same zones as proposed in this application.
3. The well is to be completed as a gas-oil dual completion and the hydrocarbons from each of the two zones will be safely and effectively produced through the tubing-casing annulus and a single string of tubing respectively.
4. The string of tubing used for the production of the Drinkard oil in the proposed dual completion will be 2-3/8" EUE tubing and will have a nominal inside diameter of 1.997 inches.
5. We propose to use the Baker Model "D" permanent type production packer in this installation.

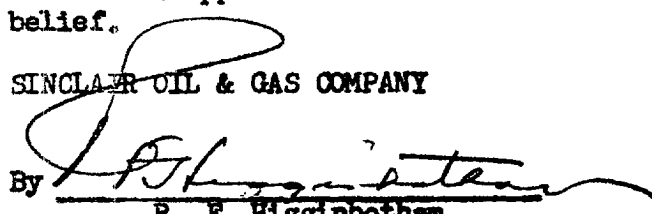

Attached to this application, please find the following items containing the information specified in Paragraph III of said Order No. R-1214:

1. Diagrammatic sketch of the dual completion installation.
2. Ownership plat showing location of all wells in area (the names and addresses of all offset Operators are listed at the end of this application.)
3. In lieu of requesting waivers from each offset Operator we are certifying that we have furnished them copies of this application by registered mail this date.
4. Marked Gamma Ray-Neutron log on subject well.

Sinclair respectfully requests that this application for permission to dually complete subject well in the Blinbry Gas Pool and the Drinkard Oil Pool be approved by the Commission.

I hereby certify that the information contained in this application is true and complete to the best of my knowledge and belief.
